

# New Zealand Cricket COVID-19 Protection Framework (CPF) – Training Guide

With the new COVID-19 Protection Framework, New Zealand Cricket has developed a guide to assist with ensuring all participants remain safe and can play and train within Government and Sport New Zealand guidelines. Your local DA/MA can provide you with support and answer any further questions you may have. This guide is based on a non COVID Vaccine Certificate environment.

## **Outdoor Training Guide - RED**

- Training can be undertaken with a designated group of up to 25 individuals. That group includes anyone involved with the activities.
- Sharing equipment including balls is permitted but it is recommended that items be sanitized before and after use.
- There is no requirement for participants to physical distance during the course of the training. During breaks or at the conclusion of the training session, physical distancing should be observed.
- A ground can have more than one group using it as long as each group has its own defined space.
- Contact tracing remains a key tool in the fight against COVID. All outdoor facilities must have a Contact Tracing QR Poster displayed and participants should be actively encouraged to scan in on arrival.

## **Outdoor Training Guide - ORANGE**

- Training can be undertaken with a designated group of up to 50 individuals. That group includes anyone involved with the activities.
- Sharing equipment including balls is permitted but it is recommended that items be sanitized before and after use.
- There is no requirement for participants to physical distance during the course of the training. During breaks or at the conclusion of the training session, physical distancing should be observed.
- A ground can have more than one group using it as long as each group has its own defined space.

- Contact tracing remains a key tool in the fight against COVID. All outdoor facilities must have a Contact Tracing QR Poster displayed and participants should be actively encouraged to scan in on arrival.

### **Outdoor Training Guide - GREEN**

- Training can be undertaken with a designated group of up to 100 individuals. That group includes anyone involved with the activities.
- Sharing equipment including balls is permitted but it is recommended that items be sanitized before and after use.
- There is no requirement for participants to physical distance during the course of the training. During breaks or at the conclusion of the training session, physical distancing should be observed.
- A ground can have more than one group using it as long as each group has its own defined space.
- Contact tracing remains a key tool in the fight against COVID. All outdoor facilities must have a Contact Tracing QR Poster displayed and participants should be actively encouraged to scan in on arrival.

### **Indoor Training Guide**

Indoor training follows the same guidelines as outdoor training venues at each level with those involve with the activity considered part of the group. Managers or others associated with the group that are not engaging with the activity are not considered part of the group and must follow physical distancing guidelines and wear masks. It is worth noting that the separation of designated spaces in an indoor setting must be with a solid wall and have its own air flow. In most cases it will be challenging to have multiple gatherings in an indoor setting for training. It is recommended that training sessions are undertaken in an outdoor setting (when possible) as this reduces the chance of the spread of COVID-19. For all public run facilities, users should check with the owner of the facility to determine the protocols that are being followed.

**Where there is doubt or confusion regarding any of the above guidelines people should favour a cautious approach and refrain from the activity.**
